

DELIVERABLES FOR PHASE II:

STEP 1:

Account ID is **LFA19SCM90J**.

STEP 3:

Now, create a new issue again in the Issues tab. If any issues are found in a certain code, we can raise an issue. Once the bug is fixed, we can then close the issue and commit to the repo.

Step 4:

Title of the issue raised here is: LFA19SCM90J adding last name. Issue number is #301.

STEP 5:

Labelling is done which follows the format- "LabelName:LabelValue".

Step 6:

According to my A number, "A20442790" the last digit is 0 and it is "even" so these will be my choices for LabelNames and their values-

- OriginationPhase: Coding
- DetectionPhase: Field
- Priority: High
- Status: pendingReview
- Category: Inquiry

STEP 8:

I opened the file j.java and entered my Account ID "LFA19SCM90J" in that file and saved it.

STEP 9:

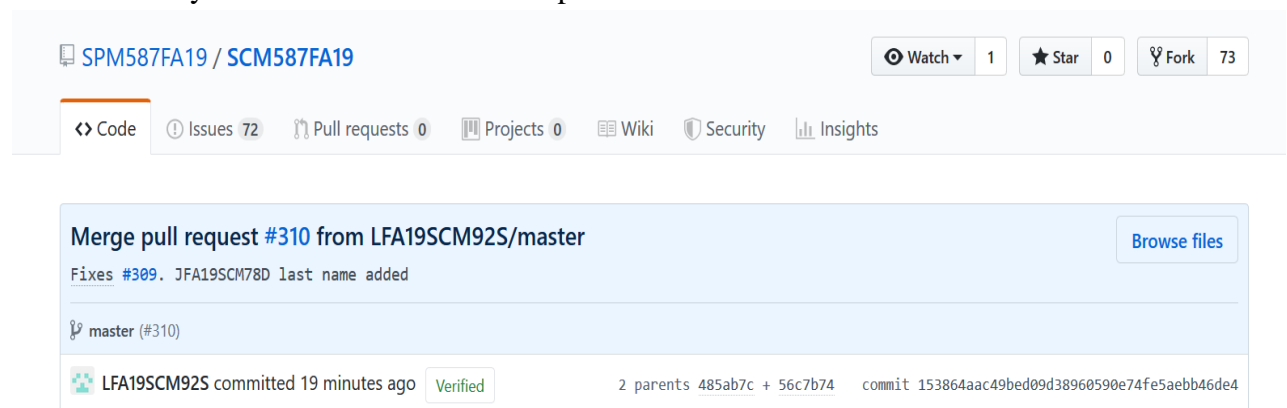

Commit and push this repo into my account. Here, the commit message was- "Fixes #173. LFA19SCM90J last name added".

Step 10:

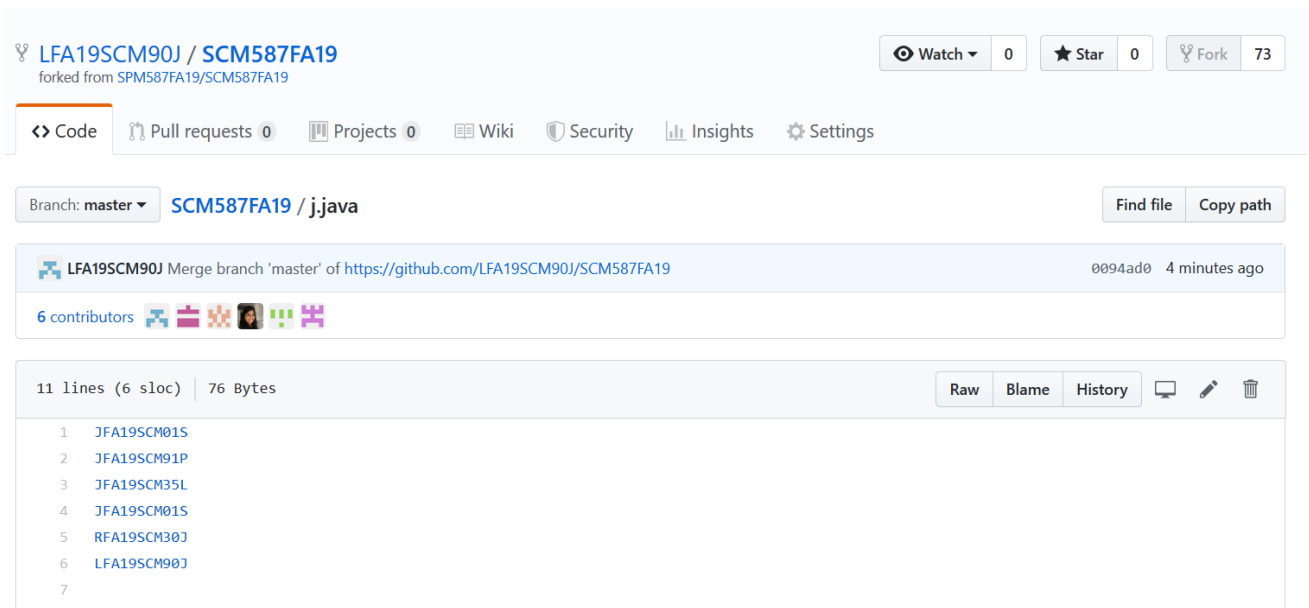

Finally, a pull request was sent to merge the changes with the parent repository which was Accepted and Verified by the Master repository creator.

Following Screenshots display the commits that I have made and which were approved.

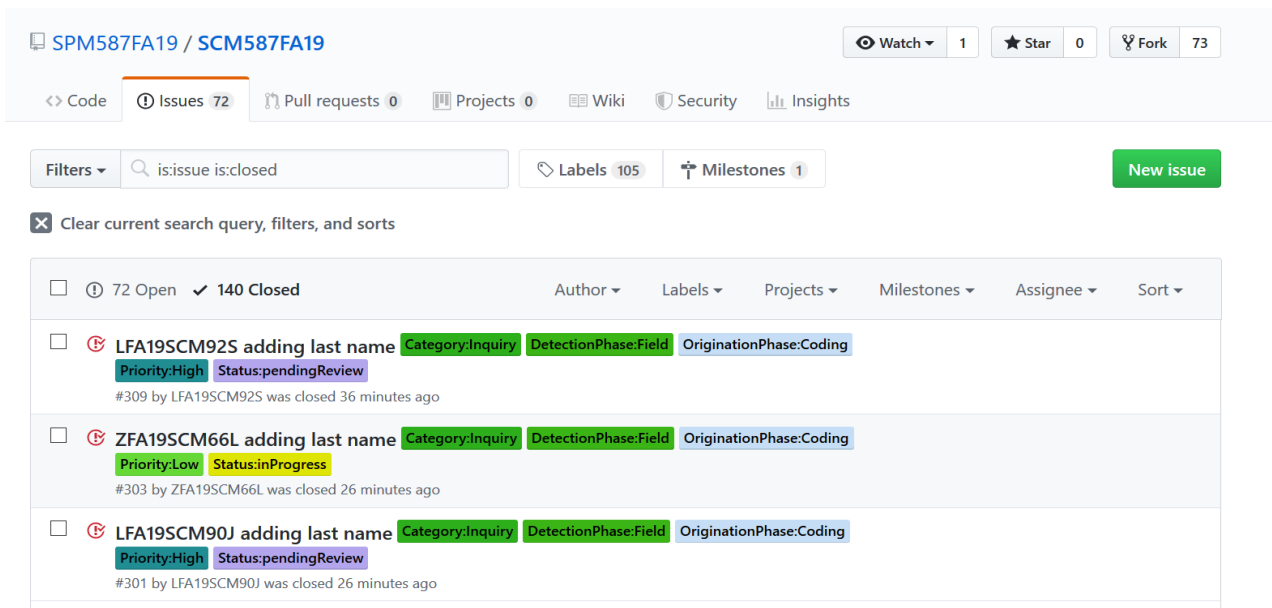

a) The below screenshot shows the merge pull request that I made and that it was accepted and verified by the creator of the master repo.

b) The below screenshot shows that I entered my ID name “LFA19SCM90J” to the J.java file and saved it.

c) The below screenshot shows that my issue “LFA19SCM90J” has been closed.

Thus, the phase II has been completed. The issue which was raised has been closed and fixed.
